Total, \$212,229.33.

WE ARE DYING TOO YOUNG

Thousands of Persons Claimed by Death Each Year—True Medical Talk—Local Specialist Claims Ninety-Eight Percent Could Be Cured If Treated in Time for Chronic Diseases.

How many die annually of chronic diseases, diseases which if diagnosed correctly, and treated in time, would save sufferers to many years of happy life and usefulness? This is a difficult question to answer, but it has been estimated that every year 35,000 people die of one chronic disease alone, Bright's Disease of the Kidneys. Uncounted thousands of others are claimed by death from liver diseases, stomach and bowel troubles, disorders of the heart, lungs, spine and other organs, and other kidney diseases. Probably one out of every five of this terrible death roll is really necessary.

Here a father dies just when life for himself and family seems brightest. There a mother's protecting and loving care is taken from her children just when they most need her guidance. Again, a young man at the very start of life, flushed with the thought of success to come, is snatched away by the grim reaper, leaving a void that can never be filled in the home. Or a maiden, a flower which has just become full blown, withers and dies by the blasting effect of invidious disease. Truly death and disease is no respecter of persons.

Neglect? Yes, truly, in a way, for there is hardly a chronic disease which, if taken in its early stages, cannot be cured. Too little attention is paid by most people to nature's danger signals. Our bodies always give warnings when all is not well, and right then is the time to consult a skillful specialist before a minor trouble is allowed to go into the organic or incurable state. Pain in back, distress after eating, dizziness, weak and run down feeling, loss of appetite, torpid liver and digestive organs, continual headaches, difficulty in getting breath, becoming tired on exertion, unable to sleep well and naturally, irritated bladder, lack of former ambition and desire to resign, nervousness, soreness of chest or abdomen, each of these symptoms is a red flag of danger meant to warn us of the breaking down of organs and the onward march of disease. We should take care of our health while we have it, and be warned in time when health shows signs of leaving us.

Dr. Bartlett, the specialist, whose offices are located on the second floor of the Toepf building, opposite the postoffice, bases his remarkable successes on two things. First, careful examination and diagnosis, for unless the underlying cause of disease is discovered no earthly treatment will prevail. The second point of success is the fact that his treatments consist of the best that can be culled from all systems of medicine, coupled with much knowledge gained by personal research and experience. This it is that enables him to successfully treat many cases after they have been pronounced incurable by others. He can refer you to hundreds of cured cases, many of them your neighbors and friends.
